

# BIRTHDAYS

Made by Elja Venigar and Klara Kranjc

- When we were young, we would always go to a birthday party that our friends invited us to.
- We ate a lot of candies and junk food like pizza, chips, burgers and in the summer we went for ice cream.

- But the most important part was our birthday cake.. We usually had a chocolate one or a fruit one. Sometimes there was a message or they made some shapes with frosting. We always put on candles, one for each year. When we were singing the happy birthday song we cut the cake and ate it.

- For drinks we had Coca-cola, fruit drinks, other bubble drinks or even kids champagne.

*NA ZDRAVJE ZA PRVO DESETKO:)*

- But now we just go to a restaurant and eat something, hang out with our friends and just enjoy that day.

- When we were kids and wanted to give our friends the best birthday gift to make them feel special. We bought some sweets, toys, note books or for coloring, some magical pens or coloring pencils and sometimes even shirts or things like that, but now we usually buy a chocolate and give some money with it or a gift-card.

The end 😊
