

9. razred – TJA, 3. teden – REŠITVE

(od 30. 3. do 3. 4.)

1. ura:

The Environment:

- a) Nowadays, people face many environmental challenges. Global warming is probably our biggest problem. Burning fossil fuels releases carbon dioxide and other gases into the atmosphere. Fossil fuels are coal, oil and gas. These gases get trapped in the atmosphere and then these gases trap in heat from the Earth. This causes the Earth to get hotter. What can we do to help? Here are some things. We should use renewable energy. We should plant a tree. And we should drive more efficient cars.
- b) 1. odvisno od posameznika (npr. I recycle, I walk to school or take the bus, I try to save energy at home...)
2. People in large cities should use public transport, use energy saving devices, drive more efficient cars, more people should use renewable energy...
3. Yes, I am. / No, I'm not.
4. odvisno od posameznika (npr. I recycle cans, paper...)
5. The most important issue facing the environment today is global warming.

The Greenhouse Effect:

- a) 1 F; 2 T; 3 F; 4 T; 5 T; 6 T; 7 F; 8 F; 9 T
- b) 1. It's the process where the heat from the Sun gets trapped in the Earth's atmosphere, causing the Earth to get hotter. It works in a similar way as a greenhouse. Light from the Sun enters our

atmosphere and heats the Earth. This heat then radiates up from the surface of the planet, but some of this heat gets trapped by the greenhouse gases that don't allow the heat to escape.

2. The ice caps are melting, the sea levels are rising, some animals are losing their natural habitat, there are floods, the number of severe weather events is increasing...

3. Save electricity in our home (turn off lights and appliance when you don't use them), use energy saving lightbulbs, fit solar panels to the roof of your home, reduce, reuse and recycle, use public transport or walk, cycle. We can also choose a more efficient car and plant a tree.
